

SARA: Solving Integrated Service Delivery

ERISS is pleased to present SARA, the only integrated, and artificially-intelligent, mobile-centric case management support system on the market today.

A cloud platform where ALL mandated partners can share and track clients, client activities and communications.

SARA's case notes automatically feed all partner state systems, giving states what they need and front-line staff, a REAL integrated case management process.

INNOVATIVE MOBILE-CENTRIC TECHNOLOGY

Sara is the only system on the market that uses two way text/email to conduct case management activities, customer surveys and more, while automatically documenting everything that happens with each client from intake through employment follow-up.

INNOVATIVE PARTNER INTEGRATION

SARA is already transferring case notes seamlessly into state WIA and TANF systems.

IMPRESSIVE ROI & PERFORMANCE METRICS

Sara is completing activities and follow-up activities at impressive levels and begins paying for itself at week 12-16.
